DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, 23, and 24, drawn to a proppant and a fluid containing the proppant , classified in class 507, subclass 269.
 - II. Claims 8-15, drawn to a process of making the proppant, classified in class 520, subclass 1.
 - III. Claims 16-22 and 25-26, drawn to a process of using the proppant, classified in class 166, subclass 278.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions ii and i are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by low-temperature polymerization.
3. Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different

Art Unit: 3673

process of using that product (MPEP § 806.05(h)). In the instant case the product can be used in a shell molding process.

4. Inventions II and III are related as process of making and process of using the product.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
